

Mako-Lube Lubricants are pleased to announce the launch of an exciting stand out range of new packaging. The striking black, red and silver colours of the Mako-Lube logo has been used to full effect on the new cartridges, pails and drums.

The new cartridges are screen printed and are a leak free design, and can even have Reiner attachments fitted for use with a Reiner grease gun!

The new stand out packaging compliments the premium quality range of lubricants within them!

After all, premium quality products deserve premium quality packaging!

Spotlight ON Food-Tek Synfood EP 2

This versatile extreme temperature synthetic grease is fortified with PTFE to give excellent wear and load resistance. It is also excellent for both high and low temperatures with a wide continuous temperature range of -50°C to +180°C and

excellent water resistance. **Food-Tek Synfood EP 2** will extend lubrication intervals whilst protecting and extending the life of bearings and components in the food, beverage and pharmaceutical industries

Mako-Lube New Product Launch Food-Tek Food Grease 3H

We are pleased to announce the launch of our new **Food-Tek Food Grease 3H**. This tacky, water resistant food grade grease is NSF 3H registered for direct food contact as a lubricant and release agent on applications such as saw blades and chopping blades on slicers, mincers, dicers and cutters in meat and poultry industries. It is also ideal for grills, ovens, hooks, boning benches and other moving components where direct food contact is inevitable.
